- ENVIRONMENT FRIENDLY
- ALL WEATHER CONDITIONED

DGS&D RATE CONTRACT

Pre-fabricated structures have come up to its real importance with its wide applicability and acceptability. These structures are now-a-days a need rather than a luxury. The DGS&D with this objective brought Pre-fabricated Structures on their Rate Contract in the year 2000.

Pre-fabricated structures manufactured by us under DGS&D Rate Contract has proved to be highly useful for the army and the police forces. These shelters are more comfortable and durable than tents providing relief from extreme climatic conditions prevalent in India. They are also economical in the long run as various forces use these shelters at their static or semi permanent location. Enormous expenditure is made on tents which need replacement after every six months as compared to twenty five years of Prefab Shelters. These structures provided better living conditions and are fire, water, termite retardant. -

PRODUCT ADVANTAGES

Robust construction: Termite, water and fire retarding structures safe in earthquake prone areas.

Quick-assembly: Unmatched assembly speed - 8 people in 24 hours for a 500sq ft house.

Attractive designs: customized to your need with a beautiful and elegant finish.

High quality: robust, durable structures, built to withstand strong winds and snow loads.

Cost effective: an affordable combination of quality and cost.

Insulation: Sandwich insulated panels provide good soundproofing, and insulation against hot and cold climates.

Light structures: easy to transport and install in remote inaccessible areas including hilly terrains.

Long Life: Once installed will match the life of conventional construction.

Flexibility in Construction: Can also be erected on steel based frameworks, with floorboards, steel deck etc. based on customer requirements.

6 steps to building the Modern Prefab House

QUALITY

Our organization is a very sensitive and stringent about the quality of the raw-materials and thus, we only buy our materials from well established vendors having international reputation with ISO/BIS certifications.

Our organization has in place stringent quality conformance systems for raw-materials, manufacturing and dispatch processes. A prototype of every building is erected to ensure its fitment quality before it is dispatched to the client.
